Hello and welcome to the CADRE learning site. This is where you can access training that will provide you with the necessary knowledge to manage sensitive data safely. This includes a training module on the Five Safes, plus two, framework as well as how roles and responsibilities play an important role in managing data within research.

To login into the website, go to the top right hand corner and click on login. Please use the institutional sign on where it will take you to a secure, single sign on page. By choosing institutional sign on, you can hopefully locate your institution. If you can't but you have an ORCID, you can use that as an alternative for signing in but the preference for authentication purposes is to use your institutional credentials first.

Please make sure to watch the navigation module once you have signed successfully. This will provide helpful information before you commence any of the modules for the first time.
